CAPABILITY STATEMENT

Visvero: We solve data problems.

Visvero is a technology services company focused on helping clients effectively leverage data for operations efficiency and improved information utilization. Since 2003, Visvero has been helping clients in Banking, Insurance, Oil & Gas, Manufacturing, Retail and Federal & Local government effectively manage their data assets.

Visvero has expertise on data and big data management, business intelligence, robotic process automation, AI and machine learning.

Unlike many large consulting companies, Visvero does not rely on large multi-year contracts for sustained revenues. We believe that the constantly meeting the expectations creates repeat engagements and repeat engagements are the true annuity revenue model. The consistent theme in all our engagements is rapid path to value realization and projects with well-defined entry and successful exit points.
